CAREER OBJECTIVE

Aspiring AI Engineer with hands-on experience building LLM-powered applications, including a Graph-RAG framework with Neo4j and Ollama and a fine-tuned DistilBERT toxicity classifier served through FastAPI. Seeking an AI Engineer role to build, deploy, and improve reliable, secure, and responsible AI solutions using Python, RAG pipelines, and APIs, while learning from experienced teams and growing through real-world challenges.

EDUCATION QUALIFICATION

- **Bachelor of Engineering - Computer Science (Artificial Intelligence and Machine Learning)**
  CMR Institute of Technology, Bengaluru
  CGPA: 8.88,2027(pursuing)
- **12th Pre-University college:**
  St. Francis Composite PU College, Bangalore
  87%,2023
- **10th Grade:**
  Cambridge public School, Bengaluru
  88.6%,2021

TECHNICAL SKILLS

Programming Languages: Python, Java, HTML, CSS, Typescript
AI & Frameworks: FastAPI, RAG, Prompt Engineering, Ollama
Data & Visualization: Power BI, Tableau
Operating Systems: Windows
Development Tools: Visual Studio Code, Eclipse
Tools: Git, GitHub, Docker, Redis, BullMQ, SSMS
Database: PostgreSQL, MySQL, SQL Server, Neo4j, Prisma

PROJECT EXPERIENCE

- **AegisGraph – Privacy-Aware Graph Intelligence Framework**
  - Developed a Graph-RAG security framework to address progressive information extraction and subgraph reconstruction risks through continuous behavioral monitoring.
  - Built a controlled graph retrieval layer using **FastAPI and parameterized Cypher queries**, enabling secure intent-based retrieval from a **Neo4j knowledge graph**.
  - Implemented a baseline Graph-RAG pipeline that converts retrieved graph context into grounded responses using **Ollama and Qwen2.5-Coder**.
  - Designed the architecture for behavioral risk analysis using signals such as semantic similarity, query frequency, entity-focused probing, and graph traversal pattern
  - **Tech Stack:** Python, TypeScript, Vite, FastAPI, Neo4j, Ollama
- **Sentinel – AI-Powered Toxicity Detection & Content Moderation System**
  - Developed a real-time content moderation system using a fine-tuned DistilBERT model to detect toxic text.
  - Fine-tuned and deployed the model on the Jigsaw Toxic Comment Dataset for toxicity classification.

- Built a FastAPI backend and interactive web interface for real-time text analysis and confidence-based scoring.
- **Tech Stack:** Python, FastAPI, PyTorch, Hugging Face Transformers, JavaScript

- **ReachInBox – Asynchronous Email Campaign Scheduling System**
  - Developed an asynchronous email scheduling system that allows users to create campaigns, upload recipient CSVs, and configure staggered email delivery and rate limits.
  - Built a RESTful backend using **Node.js, Express, TypeScript, PostgreSQL, and Prisma** for campaign and email management.
  - Implemented **Redis and BullMQ** for delayed background job processing using a dedicated email worker, with email lifecycle tracking from **Pending → Processing → Sent/Failed**.
  - Implemented per-sender rate limiting, retry handling, idempotency checks, and campaign monitoring with live status updates.
  - **Tech Stack:** TypeScript, Vite, Node.js, PostgreSQL, Prisma, Redis, BullMQ, Clerk, SMTP/Ethereal, Docker.
  - **Deployed link:** https://outbox-email-scheduler-ten.vercel.app/

CO-CURRICULAR ACTIVITIES

- **Hackathon:**
  - Repogenesis Hackathon (2025, BMSCE, Bengaluru)
  - Smart India Hackathon (2025)
  - Membrain AI Hackathon (2026) (first place Winner)
- **Club Activities:**
  - **Promotion Team Leader–Brain Bot Club (2025–2026):** Leading the club's design initiatives, including posters, event branding, and visual content creation, while mentoring peers and coordinating with the core team.
  - Conducted sessions such as **"Working of Gibber links"**, contributing to knowledge sharing and technical engagement within the club**.**
- **Certifications:**
  - Google prompting essentials specialization (Coursera)
  - The complete python Developer (Udemy)
  - NPTEL-Cloud Computing (2026-Silver Elite)

AWARDS

- Mini Project Winner – 1st Semester (2023)
- Mini Project Winner – 2nd Semester (2024)
- Mini Project Winner – 3rd Semester (2024)
- Membrain AI Hackathon – first place Winner (2026)

PERSONAL DETAILS

Gender : Male
Nationality : Indian
Languages : English, Telugu, Kannada, Hindi
Hobbies : Gaming, Travelling, listening to music
